**E-Crate.**

## ■ 25% SAVINGS

1000 Boxes = 750 Crates

## ■ 40% MORE PER TRUCKLOAD

35 Boxes (338 Cu. Ft.) vs. 200 crates  
(600 Cu. ft.)

## ■ UP TO 15% IN LABOR SAVINGS

## ■ CRATES YOU CAN LOCK

## ■ CRUSHPROOF CRATES

## ■ ENVIRONMENTALLY FRIENDLY

Reusable, easy to pack

## ■ DIRECT DELIVERY & PICK-UP

## HARD COST SAVINGS

### ■ REDUCE TRUCKLOADS by 40%

- Use E-CRATE and reduce truckload needs by up to 40%. At approximately \$1000 per truckload, this adds up to substantial savings.
- The E-CRATE and dolly system increases truckload capacity by maximizing available vertical truck space thereby reducing the number of truckloads required.

### ■ 25% FEWER CRATES NEEDED THAN BOXES

- E-CRATES are 20%-33% larger than most corrugated boxes, so on average you need 20%-33% fewer crates than boxes.
- On phased moves, crates have a 100% reuse factor, meaning even fewer crates are needed in total.
- Since E-CRATES can be reused, cardboard boxes are eliminated which means less impact on the environment.

### ■ REDUCE LABOR COSTS

- Reduce overall labor costs by eliminating hand truck-up/hand truck-down time.
- Reduce labor costs with increased dolly load capacity (4 E-CRATES per dolly vs. 3 boxes per hand truck).

## SOFT COST SAVINGS

### ■ EFFICIENT AND FAST

- E-CRATES are lockable, increasing security for sensitive material.
- E-CRATES are crushproof, and that means no damage to packed contents.
- Elimination of disposal costs and post-move clean-up time usually affiliated with cardboard boxes.
- Increased mobility for tight spaces results in overall ease of use and increased employee satisfaction.

### ■ DIRECT DELIVERY & PICKED UP

- Just-in-time delivery and pick-up service directly to you, making it easy and convenient.
- E-CRATES are delivered and picked up on a pre-determined schedule, eliminating all storage costs, employee downtime, and workplace disruption.
