

Reliable Business Relocation

Relocating an office, data center, warehouse or manufacturing facility is a complex and challenging assignment. Lile's Business Relocation Services division provides resources dedicated specifically to facility moving projects. Our relocation professionals work closely with you to understand your needs and chart an effective plan of action. We help you achieve an outstanding result, and execute your business relocation within specified budget and schedule requirements.

Our goal is to provide your business with a safe, secure and efficient relocation, complete your project within budget, and exceed your expectations. Lile's 50 years of office moving experience will provide you with timely and cost-efficient results through services such as:

- Comprehensive estimate of costs
- Project management and planning
- Systems furniture installation
- Data center and telecom equipment moves
- Storage, warehousing and distribution
- Air-ride trucks with lift gates
- Medical and hospital relocations
- Library and record center relocations

Whether you will reuse your systems furniture, purchase new work stations or use a combination of both, Lile will assist in planning, timing, dismantling and re-installation through detailed layouts, including electrical and data cabling. In addition, we have the resources to recycle and dispose of surplus equipment and materials.

We will work with your IT department on your technical equipment needs. Our tech-move crews are trained to handle computers, servers and all technology equipment required to run your business, including the physical disconnect and reconnect services that enable your staff to devote their energy to more critical functions. Maintaining your business operations with minimal disruption throughout the move process is our priority.

Focus on your business and Lile will take care of the rest.
