

Data Center Relocation

Lile International Companies has been in the Logistics and Relocation business since 1959. We are dedicated to providing specialized logistics services, and have the expertise and experience to handle sensitive and high value products. As an equity partner of Specialized Transportation Inc. (STI), we are able to extend this service to clients throughout the US and Canada.

Lile International Companies specializes in the transportation, warehousing and relocation of all types of technology for vendors and manufacturers such as rack mounted and tower servers, UPS, equipment racks and accessories, tape backup library systems, routers, switches, SAN equipment, medical and telecommunications equipment, cell towers, copiers, Kiosk, ATM and vending machines.

At Lile International Companies we understand the critical success factors that bring proven methodologies and provide the comprehensive planning to ensure incident-free relocation. We invite you to take a look at the link below showcasing a segment of a Data Center relocation process. This move entailed relocating over 500 pieces of high value equipment with an average value of \$12,000.00 per item. This relocation job was delivered a day ahead of schedule, under budget, and damage-free due to a total team effort between the customers' IT team and Project Managers, and the Lile Project Management team.
